

Update Regarding Direct Image Transfer Function for Select Cameras to CANON iIMAGE GATEWAY

September 25, 2019

Thank you for being a Canon Customer,

Beginning in mid-March 2020, the transfer of images via Wi-Fi directly to CANON iIMAGE GATEWAY or other connected services such as Google Drive from select EOS and PowerShot digital cameras will no longer be available. You can continue to use CANON iIMAGE GATEWAY or other connected services by moving the images from the camera to a compatible device (such as a smartphone or PC), where you can then upload to the CANON iIMAGE GATEWAY service.

You can continue to use the web service image transmission function until mid-March 2020. An exact date will be provided in a future notification once the information becomes available.

We apologize for any inconvenience and thank you for your continued support and interest in Canon.
